DETAILED ACTION

Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1,2,12 and 18-23, drawn to a method of ameliorating sexual dysfunction comprising administering a dopamine receptor agonist.
- II. Claims 3-11, 13-17, 24-30 and 35-61, drawn to a pharmaceutical composition comprising a dopamine receptor agonist.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product since the product has been use to treat Parkinson's disease.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
